Executive Briefing & Commercial Simulation Deck
Accenture FY2027 Commercial Monetization & Deal-Desk Governance
Target Audience: Chief Financial Officer (CFO), Practice Chairs, Client Account Leads (CALs)
Case Subject: $50M Tier-1 Core Banking GenAI Modernization Deal
Framework: FY2027 Three-Pillar Commercial Pricing Transformation

---

Slide 1: Strategic Context & The Productivity Paradox

> [!IMPORTANT]
> **The Mandate:** Traditional hourly consulting must be decoupled from GenAI engagements. Moving forward, revenue is pegged to business outcomes and software-asset leverage rather than headcount and billable hours.

Slide 2: Deal Simulation Overview ($50M GFS Engagement)

1. The Commercial Dilemma
* **Client:** Global Financial Services (GFS) — Tier-1 Global Bank
* **Scope:** Core banking modernization, automated loan underwriting, and KYC compliance engine
* **Original Baseline Fee:** **$50.0M** (Calculated via legacy T&M rate cards)
* **Client Demand:** Procurement mandates an across-the-board **15% discount ($42.5M)** under threat of competitive RFP unbundling.

2. Commercial Stakeholders
* **Marcus Vance:** Chief Procurement Officer, GFS (Focus: Cost reduction, rate-card parity)
* **Elena Rostova:** Chief Digital & Information Officer, GFS (Focus: $100M OPEX reduction, time-to-market)
* **Sarah Chen:** Client Account Lead (CAL) & Managing Director, Accenture
* **David Miller:** Commercial Architect, Global Deal Desk, Accenture

---

Slide 3: Deal Desk Governance & Approval Architecture

```mermaid
flowchart TD
    Req["Client Request: $50M with 15% Discount (42.5M)"] --> DD{"AI-CPQ Deal Desk Validation"}

    DD -- "Exceeds 8.0% Discount Floor" --> Veto["UNAUTHORIZED DISCOUNT<br>(Automatic System Veto)"]
    Veto --> MarginDrop["Operating Margin Drops to 9.67%<br>(Violates 16.40% Floor)"]

    DD -- "Apply Governance Rule 4.2" --> Structuring["Mandatory Pivot to Dual-Option Proposal"]

    Structuring --> OptA["Option A: Legacy T&M<br>• $46.0M TCV (8% Max Discount)<br>• Pruned Staffing Pyramid<br>• Client Bears 100% Risk"]
    Structuring --> OptB["Option B: FY2027 Value-Share<br>• $43.0M Base Fee (Cash Protected)<br>• +10-15% Performance Dividend<br>• Accenture Co-Invests Proprietary IP"]
```

> [!WARNING]
> **Deal Desk Rule 1 (Discount Ceiling):** Managing Directors hold a maximum delegated discount authority of **8.0%** against baseline rate cards. Any concession exceeding 8% requires C-suite approval and enforces an immediate pivot to outcome-contingent commercial packaging.

Slide 4: Dual-Option Commercial Matrix

The engagement team counter-proposes a structured dual-track commercial model:

Commercial Parameter	Option A: Legacy T&M Baseline	Option B: FY2027 Outcome-Based Value-Share
Pricing Mechanism	Input-based rate cards (Hours × Rates)	Fixed Base Implementation + Value Dividend
Contract Value (TCV)	**$46.0M$ ** $(8.0\% maximum allowed discount)$	**43.0M Base** + Up to **$7.5M Dividend**
Client Cash Outlay	$46.0M committed cash$	**43.0M committed cash** (Approaches client's $42.5M target)
Maximum Realized TCV	$46.0M capped$	**50.5M total realized** ($43.0M + $7.5M)
Risk Allocation	**100% Client Risk:** Full payment due regardless of adoption	**Shared Risk:** Up to 15% fee at risk against audited P&L savings
Delivery Methodology	Standard staffing pyramid (65% offshore / 35% onshore)	**Asset-Powered:** Injects pre-trained banking models & automation accelerators
Target Operating Margin	**16.52%**	**16.40%** (Downside) ➔ **23.15%** (With Full Dividend)

Slide 5: Performance Dividend Scorecard (Option B)

The $7.5M (15%) performance upside is structured across three audited operational KPIs:

```mermaid
pie title Option B Performance Dividend Allocation ($7.5M Total)
    "Underwriting Cycle Time ($2.625M)" : 35
    "COBOL Refactoring ($2.625M)" : 35
    "Regulatory & KYC Automation ($2.250M)" : 30
```

Operational KPI	Baseline Metric	Target Hurdle	Dividend Payout	Quantified Client Value
1. Underwriting Cycle Time	14 business days	**45% reduction** (< 7.7 days)	**35% $(2.625M)$ **	~40M annual run-rate OPEX savings
2. Core COBOL Modernization	25k LOC / month	**3.5M LOC refactored** (≥90% automated tests)	**35% ($2.625M)**	Eliminates $35M in legacy run costs
3. KYC & Regulatory Triage	72% false-positive rate	**60% deflection** of compliance alerts	**30% ($2.250M)**	$25M in risk & remediation savings

> [!NOTE]
> **Independent Value Verification:** Audited by a joint client-Accenture **Value Realization Office (VRO)** utilizing automated data pipeline queries against production logs.

Slide 6: Financial Engineering & Margin Impact Model

Accenture’s AI-CPQ engine modeled the deal economics across all five scenarios:

```
MARGIN MODEL COMPARISON
Operating Margin %
25%
──────────────────────────────────────────────────────────────────────
─ 23.15% (Option B Upside)
20% ──────────────────────────────── 16.52% (Opt A) ── 16.40% (Opt B)
15% ──── 16.50% (Baseline)
10% ──────────────────────────────── 9.67% (15% Cut) [HARD VETO]
 5%
 0%
```

Detailed Deal Profit & Loss Simulation

Deal Scenario	Top-Line Revenue	Cost of Services (COSP)	Gross Margin ($ / %)	SG&A / Indirects	Operating Margin ($)	Operating Margin (%)	Deal Desk Clearance
Baseline (Original T&M)	$50.00M	$33.50M	$16.50M (33.0%)	$5.75M	$8.25M	**16.50%**	Approved Baseline
Client Demand (15% Cut)	$42.50M	$33.50M	$9.00M (21.2%)	$4.89M	$4.11M	**9.67%**	❌ **HARD VETO (Breach)**
Option A (T&M + 8% Cut)	$46.00M	$30.82M (pruned)	$15.18M (33.0%)	$5.29M	$7.60M	**16.52%**	✅ **Approved (At Target)**
Option B (Base Only - Downside)	$43.00M	$28.38M (automated)	$14.62M (34.0%)	$4.95M	$7.05M	**16.40%**	✅ **Approved (Floor Preserved)**
Option B (Base + Full Dividend)	$50.50M	$28.38M (automated)	$22.12M (43.8%)	$5.81M	$11.69M	**23.15%**	🚀 **Approved (High-Alpha Upside)**

> [!TIP]
> **How COSP Drops from $33.5M to $28.38M:** In Option B, Accenture deploys pre-built proprietary GenAI asset libraries and automated code migration engines. This reduces total labor delivery hours by **15.3%**, transforming the "Productivity Paradox" into an internal profit generator.

Slide 7: AI-CPQ Telemetry & Rule Engine Trace

The enterprise CPQ engine validates the contract terms automatically via machine learning scoring:

```json
{
  "deal_telemetry_event": "DV-2027-GFS-0914",
  "client_account": "Global Financial Services plc",
  "industry_group": "Financial Services (Banking Modernization)",
  "contract_type": "Hybrid Value-Share (Option B)",
  "rules_evaluated": {
    "RULE_1_DISCOUNT_AUTHORITY": {
      "max_delegated_limit": "8.0%",
      "submitted_base_concession": "14.0%",
      "passed": false,
      "exception_applied": "Approved under Value-Share Exception By-Law 4.2"
    },
    "RULE_2_MARGIN_FLOOR": {
      "target_operating_margin": "16.40% - 16.60%",
      "model_simulated_downside": "16.40%",
      "model_simulated_expected": "19.78%",
      "passed": true
    },
    "RULE_3_ASSET_LEVERAGE": {
      "mandatory_ip_reuse_threshold": "≥ 25.0%",
      "calculated_firm_ip_content": "34.2%",
      "passed": true
    }
  },
  "clearance_status": "CLEARED_BY_ALGORITHM",
  "sign_off_timestamp": "2026-10-14T14:35:00Z"
}
```

Slide 8: The C-Suite "Give-Get" Negotiation Playbook

When enterprise procurement pushes back, client account leads apply strict **Give-Get Governance**:

```mermaid
graph TD
    subgraph Client Objections
        O1["We want $42.5M fixed without performance bonuses"]
        O2["How do we know savings are real and audited?"]
        O3["Competitors are offering 15% discounts on T&M"]
    end

    subgraph Accenture Give-Get Play
```

```
    P1["GIVE: $43M committed cash protection<br>GET: Performance dividend funded out of audited savings"]
    P2["GIVE: Transparent verification model<br>GET: Neutral Value Realization Office (VRO) auditing logs"]
    P3["GIVE: Skin-in-the-game outcome commitment<br>GET: Multi-year partnership vs commodity vendor rate wars"]
  end

  O1 --> P1
  O2 --> P2
  O3 --> P3
```

The Executive Responses:
1. **On Budget Caps:** *"We meet your cash ceiling at $43M today. The remaining fee is funded entirely out of verified savings that we deliver to your bottom line. If the savings do not materialize, you never pay."*
2. **On Audit Integrity:** *"Metrics are monitored inside your existing enterprise data lake through a joint Value Realization Office. The dividend triggers only on verified P&L realization."*
3. **On Competitor Discounts:** *"Competitors offering flat 15% cuts on T&M deploy junior talent and monetize through scope delays. We co-invest $5M+ of proprietary AI assets into your infrastructure to guarantee operational outcomes."*

Slide 9: CFO Summary & Action Roadmap

```
┌──────────────────────────────────────────────────────────────────────────────┐
│                          KEY CFO TAKEAWAYS                                   │
├──────────────────────────────────────────────────────────────────────────────┤
│ 1. Value-share pricing completely neutralizes the GenAI Productivity Paradox.│
│ 2. Automated Deal Desk rules protect the 16.4%–16.6% operating margin floor. │
│ 3. Asset reuse and proprietary accelerators reduce delivery COSP by over 15%.│
│ 4. Outcome dividends unlock lucrative upside participation (up to 23.15% margin).│
└──────────────────────────────────────────────────────────────────────────────┘
```

Immediate Implementation Timeline (FY2027)
* **Q1:** Mandate automated Deal Desk discount locks (8% ceiling) across North America and Europe.
* **Q2:** Roll out the GenAI Value-Based Pricing Playbook to top 50 Diamond Accounts.
* **Q3:** Launch unified subscription rate cards for the Accenture Dell Business Group globally.

* **Q4:** Align Managing Director compensation directly to CPQ gross margin dollars rather than raw bookings volume.
